EDUCATION

University of Central Florida

Master of Science in Data Analytics (Big Data)

Orlando, FL

Dec 2020

Lahore University of Management Sciences

Bachelor of Science (Hons.) in Computer Science

Lahore, Pakistan

May 2019

Relevant Coursework: Data Preparation, Statistical Analysis, Network Science, Artificial intelligence, Data Structures, Algorithms, Advance Programming, Software Engineering, Databases

WORK EXPERIENCE

Goodlogics

Software Engineering Intern

Lahore, Pakistan

May 2018 - Sep 2018

- Developed web applications in ReactJs for various clients in the financial sector.
- Tested multiple websites using Selenium and provided programming support for fault detection.

ACADEMIC PROJECTS

Linux Kernel Specialization - BSc (Hons.) Thesis

Jan 2019 - May 2019

Tools: *LLVM*

- Using LLVM, wrote module passes that figured out which system calls an application was using and optimised the Linux Kernel by removing unnecessary functionality. [Thttpd](#), an open source software web server from ACME Laboratories, and a few computer vision applications were used for testing. The resulting compiled kernels were smaller and more secure. This project was done in collaboration with [Stanford research institute](#).

BrainCare - CS 466: Human Computer Interaction

Oct 2018 - Dec 2018

Tools: *C#, Unity*

- Developed an Android/iOS application for early detection and control of Dementia symptoms in patients. Through interactive games and activities that promote cognitive functions, the application addresses problems like short term memory loss, and difficulties in navigation, communication and concentration. This work was done in collaboration with [Alzheimer's Pakistan](#).

Learning Management System - CS 360: Software Engineering

Feb 2018 - Apr 2018

Tools: *HTML, NodeJs, Heroku*

- Developed a web application for teachers/students to manage their courses. The system enables teachers to upload assignments and grades, and communicate with students through announcements. On the other end, registered students can download assignments, upload their work, check grades and view announcements. Deployed this web app on Heroku.

SKILLS

Languages

C++, Python, SAS, SQL, JavaScript, HTML, PHP, CSS

Tools and Frameworks

Tableau, Selenium, MongoDB, Heroku, Unity, NodeJs, ReactJs, Bootstrap, Flask
